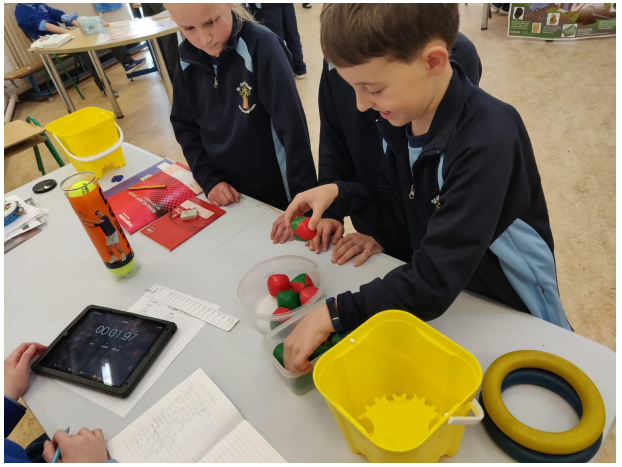
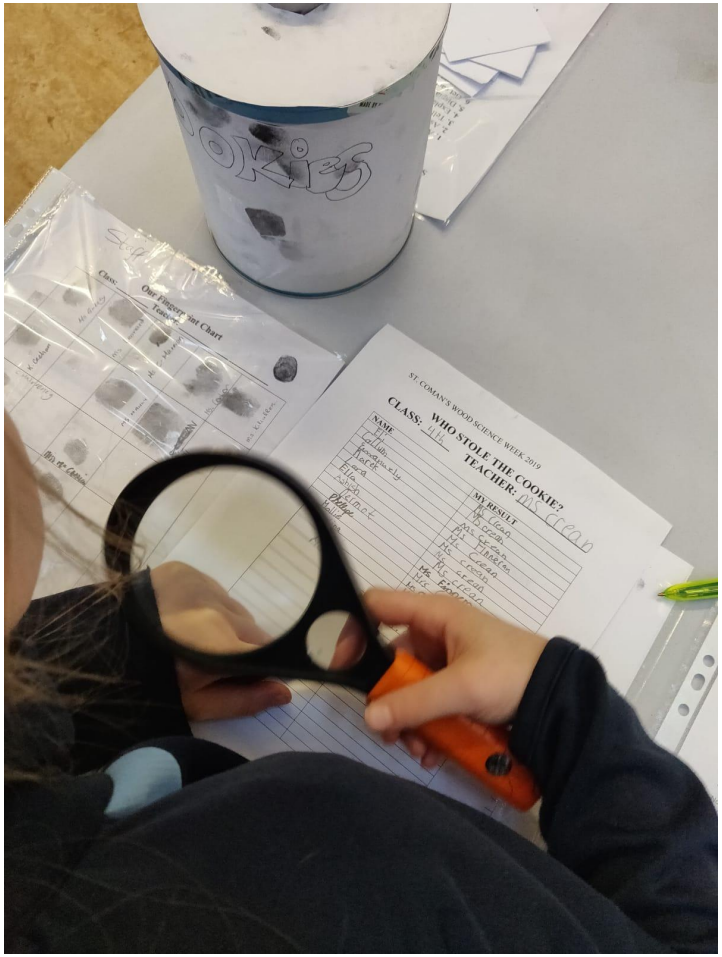
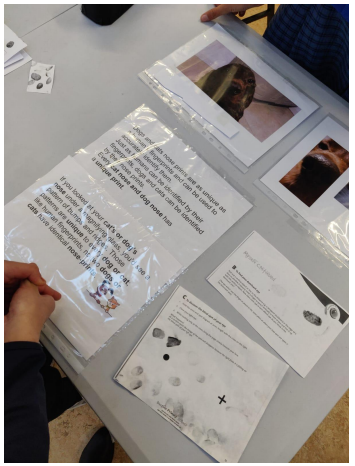
St. Comán's Wood Roscommon
Science Showcase

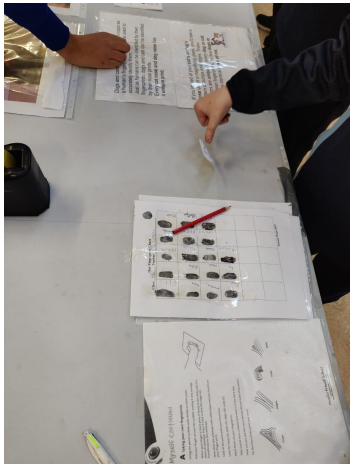


- Our Science Circuit this year, hosted by some of our 6th class pupils and Ms. Mannion proved to be very successful event. We had a broad range of experiments and challenges which were hosted over a 4 day period to ensure **all of our pupils** on the senior site (4th, 5th and 6th class) got to complete each experiment/discovery station. Pupils from Ms. Mannion's 6th class were each given charge of a station and had prepared themselves to guide the pupils through the challenges as well as keeping the station tidy for the next group. We used a lot of mathematical skills also during this week. These included estimating, predicting, measuring, recording and analysing. Thanks also, to some pupils from Ms. Gately's 6th class who helped us out during the week. The St. Comán's Wood Circuit was very much a hands-on approach to Science and was a great success. Pupils and staff really enjoyed the experience.

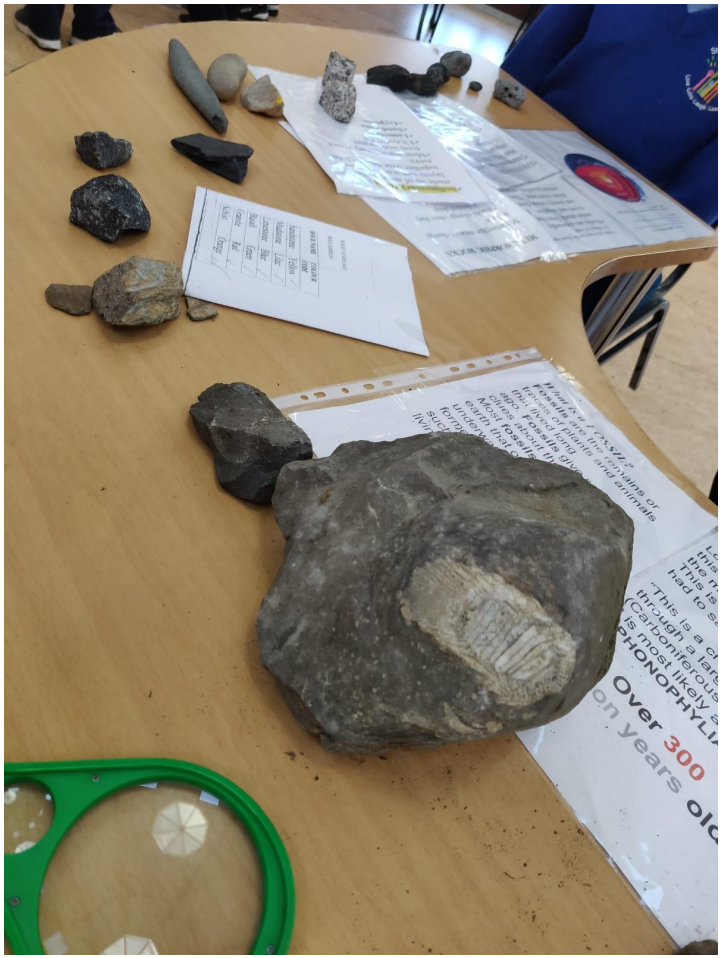
Science Showcase: Fingerprinting Station & Challenge

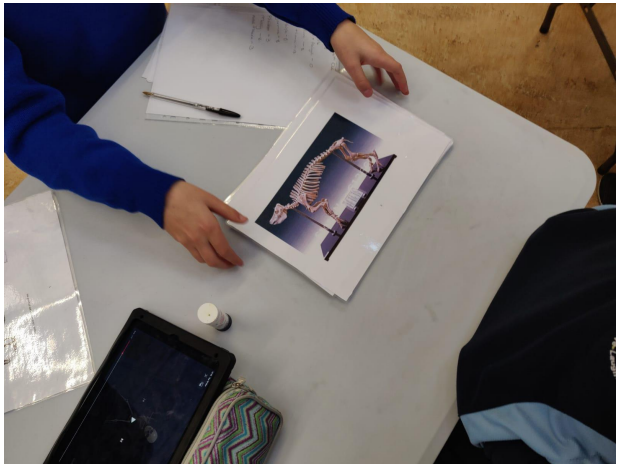




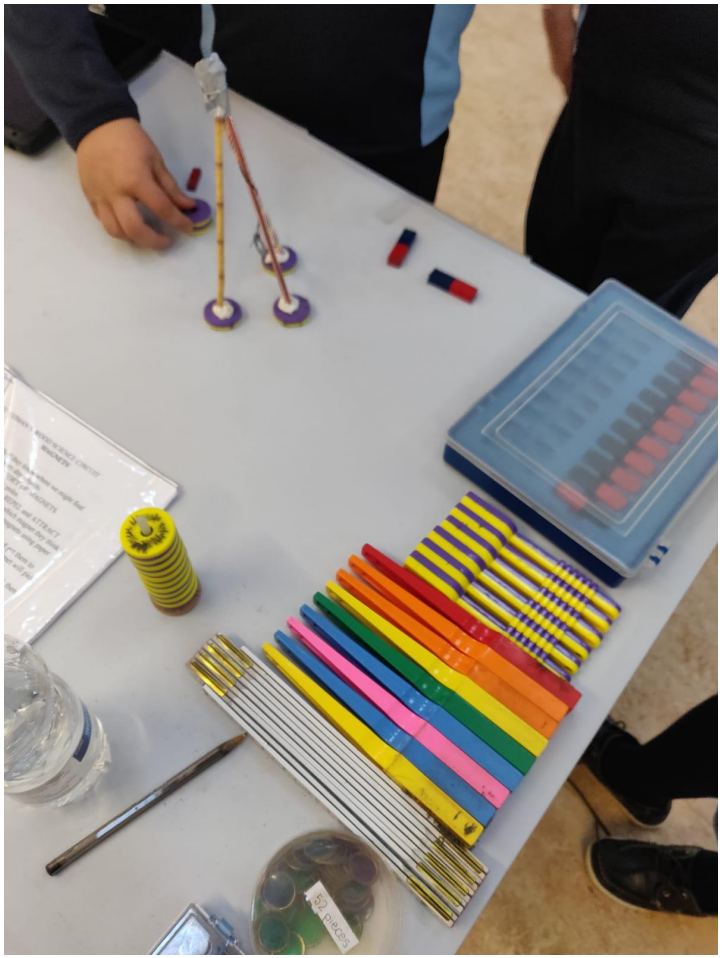


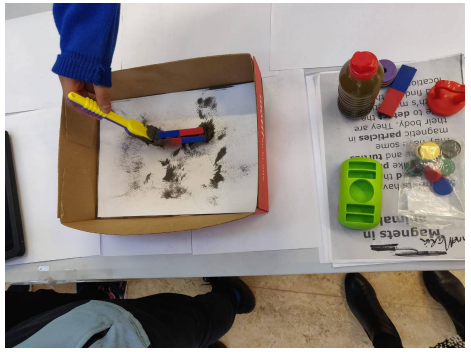
Science Showcase: Fossils, Rocks & Soil Station





Science Showcase: Magnets Station & Challenges

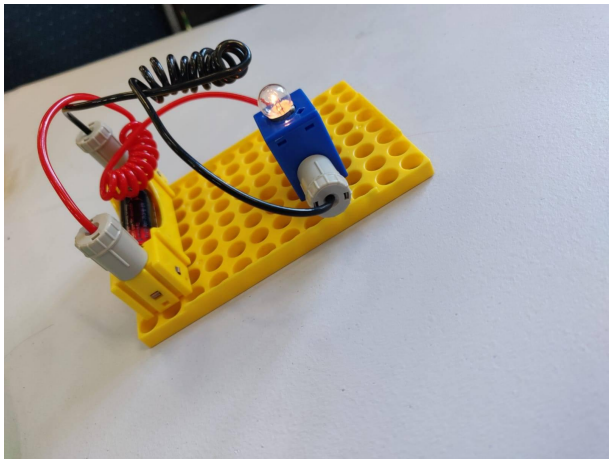


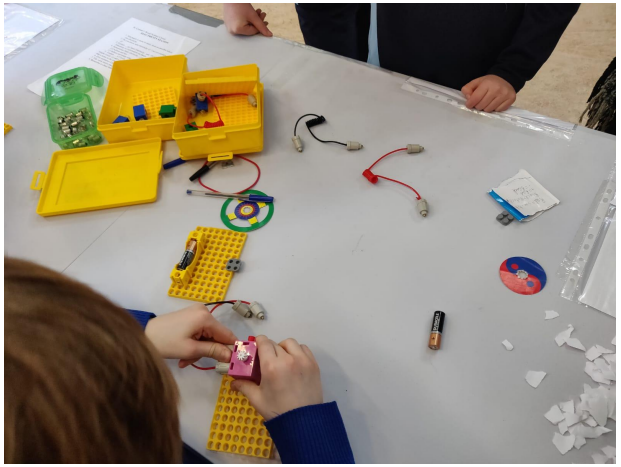


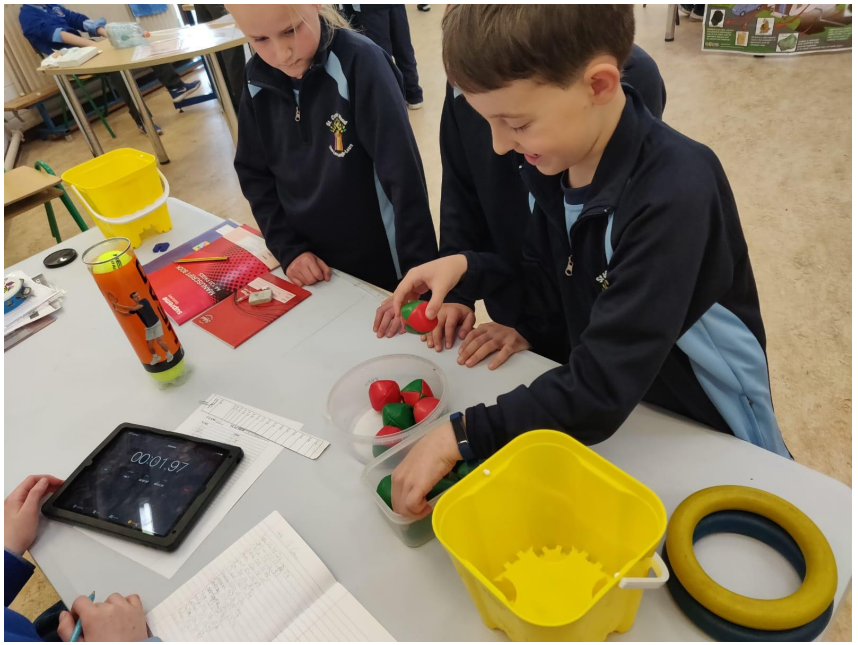
Science Showcase: Lung Capacity

Science Showcase: Sound, The Ear, String Telephone

Science Showcase: Electricty & Circuits





Science Showcase: Rocket Launch & The Great Marble Run Challenges!


Science Showcase: Hand-eye Co-ordination & Balance Station
