

CBS Sci-Fest that was attended by Senior pupils from St. Comán's Wood

Science Week November 2019

- The CBS secondary school again hosted their annual Sci-Fest during Science Week 2019, which is also open to entries from surrounding primary school pupils in 4th, 5th and 6th class. Again, this year, all of our pupils in 4th, 5th and 6th took on the challenge. Pupils in each class presented their science projects to their own class and a visiting class. The standard of work presented was absolutely excellent and it was a wonderful opportunity for all of our pupils to gain experience presenting their experiments and answering questions about their findings. Unfortunately, every project could not be sent to the CBS Sci-Fest 2019 so one project was selected from each class. It was a really tough decision owing to the exceptionally high standard of work presented.

- On Thursday of Science Week 2019, we headed for the CBS and each group had to set up their presentation stand and put up posters in preparation for the judges and the visiting schools. We had a total of 20 students representing St. Coman's Wood. Each project was assessed by the judges and in the afternoon, we attended the awards ceremony and a fantastic Science Show which was hosted by 5th year pupils from the CBS. All pupils from our 4th, 5th and 6th class came to visit the Sci-Fest and it was an excellent opportunity for them to see the wonderful science projects presented by the secondary school pupils.
- CEO of Sci-fest, Sheila Porter, was in attendance at the event to help judge the projects and was hugely impressed by the high standard of the projects from both primary and secondary pupils.

- A group of our 6th class pupils won the overall primary school section with their experiment on DNA. Congratulations Erika, Daniella and Ava. Some of our groups also received 2nd and 3rd placings as well as the Best Communicator award. Overall, 9 of our pupils received awards. What a fantastic achievement. This was a wonderful experience for all of our pupils. I have no doubt that we have dozens of young and enthusiastic scientists in the making. Each group really gave their best performance at the Sci-Fest and during their classroom presentations. Well done to all of you...you really made us proud.
